(54) SOLID DENTAL COMPOSITION

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain an excellent re-calcifying effect.

SOLUTION: This dental composition having the re-calcifying effect to teeth is prepared by mixing a calcium-containing component (A), a fluorine-containing component and/or a phosphate (B), an organic acid (C) and a carbonate and/or a hydrogencarbonate (D) and adjusting the pH at the beginning of its dissolution to 3 to 4 and the pH at the end of its dissolution to 5 to 8.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
